## Where does Program One collections come from?

Program One itself contains passion, art, creativity, innovation and everything captivating the user in the search of the stylistic distinctiveness of his living.

This collection is inspired by the geometric circle. The shape is round, universal, simple, yet when combined with good proportional balance and creativity, perfect unto itself.

Program One is a collection designed by AF New York to create a program to communicate the global language of architecture, as it relates to all world urban areas for both residential and contract projects and the budgetary requirements of project development.

AF | NY

Fine art, modern technology, New York Design, and the idea of customization were key factors in creating this program.

AF-NY has been a proponent of the NY Design Movement and this program was an expression of that design philosophy that was developed in New York City for the world market.
